VISION

Al-Own pursues its strategic objective of establishing itself as a leader among local and regional companies by introducing the most technologically advanced equipment alongside our highly experienced professionals.

MISSION

- Our objective is to deliver high-quality, cost-effective projects in a highly competitive market.
- We maintain high levels of commitment and transparency throughout our business deals and sustain solid long-term relationships with our clients.
- AAC adheres to building unique reputation in the fields of construction and mining industry through providing highly qualified standards of services, fully equipped with high-tech machinery and equipment.
 - AAC executes Lump Sum Turnkey (LSTK), Engineering, Procurement, and construction (EPC) and Lump Sum Building (LSB) projects; such entails combining technical expertise with immense knowledge and high caliber.

Drilling and Exploration Key Projects Al Own

1. Oil Shale and Marble Drilling & Geophysical Study
2. Exploration for Uranium Drilling Boreholes Khan Zabeab
3. Oil Shale Exploration Attarat Um Ghudran
4. Drilling Service - Cutting & Core Drilling for Oil Shale Exploration
5. Agreement for Services of Oil Shale Exploration & Gamma Logging
6. Drilling Services for Phosphate - Al-Jalameed
7. Services Agreement - Oil Shale Exploration - Wadi Abu Al-Hamam
8. Drilling Boreholes for Dolomite Exploration - Ras Al Naqab & Phosphate in Shediya

1. OIL SHALE AND MARBLE DRILLING & GEOPHYSICAL STUDY

Project Value: USD 1 Million ➤ **Client:** Al Qamar for Energy and Infrastructure

➤ **Status:** 100% Completed

The project includes the Gamma logging for two full core boreholes in QEI oil shale project at Attarat. Boreholes for Gamma logging:

- QC -14 with total depth 121 m.
- QC - 08 with total depth 124 m.

Geophysical Well-Logging report. The report provided records of spectral gamma ray (SGR) logs to focus on geological analysis regarding determination of the oil shale content in studied deposits, identification of fissure zones, to determine the organic matter content and the characteristics of sedimentary conditions.

The boreholes were drilled with truck mounted rotary drilling rigs using compressed air/water flush. All boreholes were drilled vertical (90°) in alignment. (62 boreholes).

2. EXPLORATION FOR URANIUM DRILLING BOREHOLES KHAN ZABEB

Project Value: USD 1 Million ➤ **Client:** Uranium Mining Company

➤ **Status:** 100% Completed

The project Includes the drilling, exploration, data analysis and logging, core sampling and testing, inclined and straight boreholes, and site evaluation. (2,000 boreholes).

3. OIL SHALE EXPLORATION 3 LOTS - ATTARAT UM GHUDRAN

Project Value: USD 1.5 Million ➤ **Client:** Jordan Oil Shale Company / ENEFIT

➤ **Status:** 100% Completed

The project Includes the drilling, exploration, data analysis and logging, core sampling and testing, inclined and straight boreholes, and site evaluation. (125 boreholes).

4. DRILLING SERVICE - CUTTING & CORE DRILLING FOR OIL SHALE EXPLORATION

Project Value: USD 600 Thousand ➤ **Client:** Saudi Arabian Corporation for Oil Shale (SACOS) ➤ **Status:** 100% Completed

The project Includes the drilling, exploration, data analysis and logging, core sampling and testing, inclined and straight boreholes, and site evaluation. (400 boreholes).

5. AGREEMENT FOR SERVICES OF OIL SHALE EXPLORATION & GAMMA LOGGING

Project Value: USD 200 Thousand ➤ **Client:** Attarat Mining Company (AMCO)

➤ **Status:** 100% Completed

The project Includes drilling, exploration, data analysis & logging, core sampling & testing, inclined & straight boreholes, and site evaluation (150 boreholes).

6. DRILLING SERVICES FOR PHOSPHATE - ALJALAMEED

Project Value: USD 200 Thousand ➤ **Client:** Ma'aden & Comedat Phosphate (Saudi Arabia) ➤ **Status:** 100% Completed

The project Includes the drilling, exploration, data analysis and logging, core sampling and testing, inclined and straight boreholes, and site evaluation (245 boreholes).

7. SERVICES AGREEMENT - OIL SHALE EXPLORATION - WADI ABU AL-HAMAM

Project Value: USD 125 Thousand ➤ **Client:** INTEK ➤ **Status:** 100% Completed

The project Includes the drilling, exploration, data analysis and logging, core sampling and testing, inclined and straight boreholes, and site evaluation (5 boreholes).

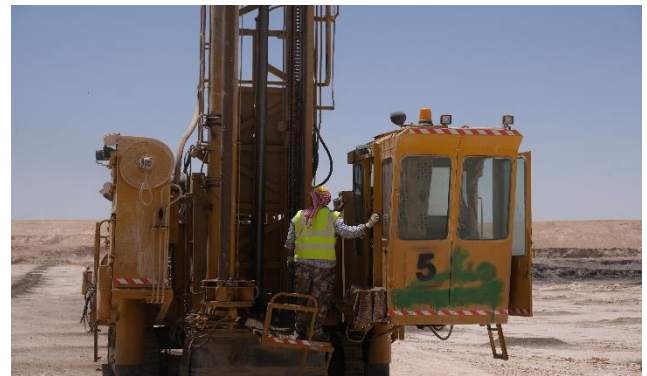

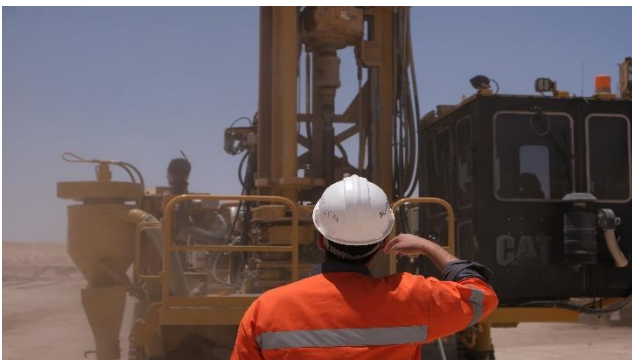

8. DRILLING BOREHOLE FOR DOLOMITE EXPLORATION- RAS AL NAQAB & PHOSPHATE IN SHEDIYA

Projects Value: USD 125 Thousand ➤ **Client:** Natural Resources Authority (NRA) ➤ **Status:** 100% Completed

The project Includes the drilling, exploration, data analysis and logging, core sampling and testing, inclined and straight boreholes, and site evaluation (275 boreholes).

EQUIPMENT

Al Own owns and operates a fleet of specialized equipment for mining, earthworks, and construction projects. A summary of the major fleet equipment is listed below:

- Excavators (40-300 Ton) CAT & KOMATSU
- Dump Trucks (25-100 Ton) CAT & MERCEDES
- Wheel Loaders sizes (5m³ - 12m³) CAT & KOMATSU
- Drilling Rigs (Atlas Copco & CAT)
- Bulldozers D8 & D9 & D10 CAT
- Motor Graders CAT & KOMATSU
- Concrete Pumps & Mixers (PUTZMEISTER & LIEBHERR)
- Asphalt Machinery CAT & HAM & WIRTGEN
- Mobile Cranes GROVE & TEREX
- Ramming , Drilling and Exploration Machines
- Screens & Crushers (Fixed and Mobile Plants)
- Rollers, Scrapers, and Pavers
- Shipping and Transport Mechanisms
- Genset Generators All Sizes
- Fuel, Anfo, Water and Service Trucks
- Light Vehicles, Forklifts, Telehandlers & Tankers

SERVICE & MAINTENANCE DEPARTMENTS

Our fully equipped and conveniently located workshop facilities provide a comprehensive range of mining and construction equipment repairs and maintenance services which are conducted both in house and on-site. Based in Al Abiad, Jordan, our workshops are renowned as one of the best in the country. Supervised and managed by qualified mining and construction plant engineers with a shared commitment to service excellence.

All component rebuilds are done to OEM standards and best practices, and our component repairs and rebuilds come with an OEM parts warranty. From our Al Abiad operation we have a full stocked warehouse where parts and components around (\$15 million) can be transported to any location in the world to support our operations.

PROJECT GALERY

KEY CLIENTS

- Ministry of Public Works and Housing
- Greater Amman Municipality
- The Jordanian Armed Forces
- Jordan Phosphate and Mining Company
- Water Authority of Jordan
- Maaden Phosphate Company MPC
- Ministry of Municipal and Rural Affairs
- Ministry of Energy and Mineral Resources

SUPPLIERS AND PARTNERS
